Employment

Taverner Research Group - Field Operator

2022-Ongoing

Whilst working with Taverner, I am tasked with going to designated regions based on the customers specification and survey relevant people on their thoughts regarding what the customer wants to discover. This job makes great use of interpersonal skills, communication, and the ability to be verbally articulate as to get the most useful information regarding the survey.

Cadgile Work Placement (Contract)

2019

My work placement and Cadgile taught me the workflows of 3D Modeling as well as common business practice within the field. The week consisted of attending full work days dedicated to shadowing some of the modeling staff and learning from them

SA Power Networks Engineering Scholarship (Contract)

2018

During my time at SAPN, I worked in the Marleston office under the CEO and the Manager of Engineering Design and Technical Services. I was tasked with creating 3D models of electrical substation systems from their 2D blueprints. I was required to properly utilize the material simulation and model registry softwares implemented by the company.

Playford International College - ICT front desk and repairs

2017 March - 2019 September

Assisting students and staff with maintenance requests for personal devices and school equipment as well as taking stock inventory. Required knowledge of the many types of devices in use by the school as well as repair and maintenance skills in each of them.

Chillos Cafe - Waiter, Delivery, Food Prep, Cashier

2017 January - 2019 August

Taking orders from customers and serving food and drinks on the dining floor, as well as taking delivery orders throughout the shopping center to other businesses. Required time management skills and swift decision making to keep pace with peak hour demand and maintaining the dining floor. I also assisted in preparing parts of the next day's dishes and packing down for closing.
